[Orthodontics - Journals - NCBI](#)

Orthodontic preparation is critical to the success of orthognathic surgery. Recognition and correction of existing dental compensations allows full correction of skeletal discrepancies. Presurgical orthodontic goals are important to define at the start of treatment and may not always include complete arch leveling or space closure, or ideal interditation.

[Orthodontic Products | Practical Solutions for Orthodontist](#)

In the late 19 th century, Norman W. Kinsley and Edward H. Angle pioneered ideas on misalignment of teeth and formed the principles upon which modern orthodontic treatment is based. Using long-term pressure and regular adjustments, dentists of the early 1900s refined orthodontic practices to create methods similar to those in use today. Early bands and wires were made of precious metals such ...
